

Levente Orban

Software Engineer & Product Manager

orbanlevi.hu
leventeorb@gmail.com
+36707010806

Levente's one of the founders of dyrector.io. One of his greatest achievements as a leader is assembling a team of dedicated specialists, who not only like to deliver to clients but also like to spend time together. In his free time, Levente likes to educate himself with business related books and excercise, including swimming and running. On special occasions, he likes to go scuba diving, too.

TECH EXPERIENCE

dyrector.io @ Co-founder December 2020 – Present

My responsibilities are to communicate effectively across teams to create alignment between design, engineering and customers. Evaluate user feedback and improvement areas to identify new feature opportunities that will guide our roadmap. Own product delivery from initial concept through design, launch, and customer adoption. Responsible for all aspects of technology product development including discovery, requirements gathering, development, and implementation of features.
